25 September 2009

Dear Mary Bergin,

P0 Box 148
Shaftesbury
Dorset
SP7 7AH

**Do you have members unable to join social outings
due to poor mobility?**

**Are members struggling with functional activities such as stairs or
getting out of bed?**

Are members concerned about their balance?

It is so easy to take things such as standing up and walking around for granted, yet many of your members will struggle with these everyday activities. Physio-Neuro can enable improvements to be made providing specialist rehabilitation for all neurological conditions including Transverse Myelitis. Treatments are individualised and may include stretches, balance work, exercises and improvements in walking.

Physio-Neuro is a mobile service, so there is no travelling involved for the member, which reduces stress and anxiety. Family or carers can easily be kept fully informed of progress and any recommended home programme.

Members will have the confidence of knowing that they are being given the best possible care, by an experienced specialist neurological physiotherapist. Relatives can, of course, be present during treatment sessions as we are able to offer weekend and evening appointments.

As an Introductory offer we are offering a discounted rate for your members. Anyone who books an appointment with Physio-Neuro before the 31 December 2009 quoting reference **TM1209** will be entitled to the discounted rate of £55 per 1 hour session excluding travel costs. This is a saving of £5 per session and will be valid for 12 months from start of treatment. Call us today on **07952 435258** to find out more. You may also wish to visit our website for further information at www.physio-neuro.com.

Yours sincerely,

Elizabeth Richards
